Good day Dr. Martin

This letter is to inform you that your name and your work of more than twenty (20) years researching and developing organic based products and systems to counter pathogens including the current COVID-19(SARS COV2) strain is of significant value.

With that in mind, you and your work have been submitted to the Nobel Prize nominating committee for consideration. Submissions go through a selection process and those final selections are held in secret until an announcement is made.

The nominating period this year was extended due to the COVID-19(SARS COV2) pandemic and your work with this problem merited a nomination.

Any further contact you receive would be from the Nobel Committee. I wish you well and God Speed in your valuable work.

A handwritten signature in black ink, appearing to read "Dr. Roscoe M. Moore Jr.", with a long, sweeping underline.

Signed: Dr. Roscoe M. Moore Jr., former Assistant United States Surgeon General (Retired)
